

## THE BENEFITS OF THE FLOORTECH FLOORING SYSTEM AN ALTERNATIVE TO CONVENTIONAL CAST IN-SITU SUSPENDED SLABS

**1** Reduced building time as curing and propping time is reduced by up to 2 weeks.

**2**

AC Services can be contained in the void between the floor and the ceiling (limitations apply).

**3**

Recessed lighting easily accommodated and can be altered after construction.

**4**

All services such as plumbing and electrical are easily accessible after construction enabling alterations to be carried out.

**5**

Main supporting beams contained in the gap between floor and ceiling thus making a flat ceiling with no downturn beams. Large spans achievable with flat ceiling.
